The Adult Partial Hospital Program at Stormont-Vail West offers intensive outpatient intervention in a structured, supportive day setting.

The program operates 9 a.m. to 2:30 p.m. Monday through Friday for adults with psychiatric illness.

Clinical Staff:

Taylor Porter, M.D., is the medical director of the Partial Hospital and Adult Inpatient programs. As the on-site psychiatrist, Dr. Porter provides the psychiatric evaluations and ongoing clinical supervision of the patient's treatment process throughout the course of the program.

Our staff to patient ratio is one to five: Our clinical staff includes:

Two A.R.N.P.s	One R.N.
Two L.S.C.S.W.s	One L.M.S.W.
One O.T.R./L.	One Pharmacist
One Activity Therapist	One Chaplain

Program Goals:

The Partial Hospital Program is ideal as a crisis stabilization alternative to inpatient hospitalization. It also provides treatment during transition to community living following hospitalization for acute psychiatric illness. When traditional outpatient clinics or office visits can no longer meet a person's clinical needs, this partial program can provide intensive, ambulatory care.

The program provides patients with the skills to transition back to healthier functioning. Individuals must have a sufficient level of cognitive ability to benefit from this therapeutic program.

Length of Stay:

The Partial Hospital Program is an intense, short-term treatment program. Length of stay will depend upon the patient's individual treatment needs.

Group Therapies:

Clients will participate in groups led by licensed staff. The overall goal for group work is to learn new coping strategies and enhance life skills.

Accommodations:

The Partial Hospital Program's separate entrance allows for direct, personal access. Our spacious, home-like atmosphere with windows overlooking two garden patios provides a safe and secure healing environment. Nutritious noon meals and refreshments are provided in the hospital's cafeteria. We take pride in our warm and caring atmosphere and the individualized treatment we provide. Our staff will be happy to help with admission and can assist with transportation needs.

Insurance:

Stormont-Vail *West* acknowledges all insurance companies and private pay arrangements. Medicare is an approved provider for the Adult Partial Hospital Program. We will contact all commercial insurance companies for partial hospital benefits and preapproval.
